

You Pay For One Every Year

Why not have one this year?

Weigh your saving in corn, your reduced need for hay, bran and other expensive fodder, the improved condition of your cattle from silage feeding, against the cost of a silo and there is only one way to figure it

You're Not Saving But Losing Money

by trying to do without a silo.

And every year you hesitate means a probably increased cost due to advancing costs of lumber, metals and labor. No better time than "right now", no better place than right here at home to get that silo you need.

Let Us Prove It With Figures.

What Ira T. Moser of Milledgeville has to say about cream separators this week.

It will be worth your while to find out what some of your neighbors who use De Laval Cream Separators think of their machines before you buy any separator. About the best thing we can say for the De Laval is that all the farmers around here who use it are boosters.

It does good work for them and pleases them, and we know it will please you.

Make it a point to ask your neighbor about his De Laval.

There are nearly two million satisfied De Laval users throughout the world. More De Laval Separators are in use than all other makes combined. It isn't the cheapest, but the majority of separator users have found out by experience that it is the best and by far the most economical separator to own.

We want to tell you about an arrangement we have whereby you can make partial payment at time of purchase and pay the balance on such liberal terms that the De Laval will save its cost while you are paying for it.

Come in and see on the first time you have a chance and talk it over.

Sooner or later you will buy a DE LAVAL
